

BRANDON TASHI

Parsippany, NJ 07054

862.217.9919 • brandontibet@gmail.com • <https://www.linkedin.com/in/brandon-tashi>

Aerospace Engineering student seeking a full-time internship position in **General Engineering**. Expert in HTML, CSS, Bootstrap, Python, and JavaScript. Intermediate in Unity, C#, and MATLAB. Experienced in Fusion 360, AutoCAD, CATIA, Visual Studio Code, Sublime Text, Atom, and Command Prompt. Skilled in soldering, 3-D printing, workshop tools, and reverse engineering. Proficient with Arduino and Raspberry Pi. Multi-lingual, conversational in Mandarin. Profound leadership/teamwork capability from being a tennis coach.

EDUCATION

Embry-Riddle Aeronautical University

Bachelor of Science in Aerospace Engineering

Expected graduation: June 2024

GPA: 4.0

Related Coursework:

Multivariable Calculus	Physics I For Engineers	Calculus 2
Graphical Communications	Intro to Programming for Engineers	English Composition

PROJECTS

Robot Vacuum Cleaner

Oct 2020 – Jan 2021

- 3-D printed and Arduino Nano powered.
- Features a modular, flexible design.
- Uses ultrasonic sensors to navigate terrain.

Deep-Learning Voice Assistant

Jul 2020 – Jan 2021

- Chatbot voice assistant built using python library TensorFlow.
- Current features: geolocation-based weather, Wikipedia knowledge base, time check, “help” function.
- Uses Google Text-to-Speech/IBM Speech-to-Text APIs.
- Modular JSON training data frame to suit all applications, customizable wake phrases.

Two-Stage Model Rocket

Jan 2020 – Aug 2020

- Consisted of an onboard Raspberry Pi Zero W, barometric pressure/temperature/altitude sensor.
- Uses cardboard tubing and 3-D printed fins/nose cones.
- Wireless data stream to computer using a python server pipeline.
- Simulated rocket trajectory using Open Rocket.

AI Smart Glasses

Jan 2021 – Present

- Carries an onboard Raspberry Pi Zero W and offline deep-learning voice assistant.
- Includes a microphone and bone conduction transducer.
- Can connect to cellular devices via Bluetooth.

Smartwatch

Jan 2020 – Present

- Touchscreen metro-styled UI built using HTML, CSS, JavaScript, and Metro 4.
- Raspberry Pi Zero W powered; planning to integrate voice assistant using Flask.
- 3-D printed chassis.

WORK EXPERIENCE

David Kramer Tennis Academy, Florham Park, NJ

Aug 2018, 2 Weeks, 6 Hours/Day

Volunteer Summer Tennis Coach

- Responsible for assisting main coaches
- Led specific court activities during camp session
- Helped manage major camp events
- Established a cooperative and amiable atmosphere
